

Pauli, Paul 'Generalized Complement'
Helv. Phys. Acta. (1967) 40 539.
refers to Pauli (1932) Collected Papers p. 608.

defines notion of weak Complement
to that describes (negations) for
non-Caffing stock domains need
not commute.

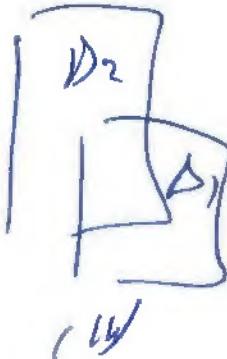

Eq. would become if \bar{F}_D commutes
then $D \rightarrow \bar{F}_D$ is regular valued

(I)

(II')

(III)

We then have (I) is compatible
(II) is compatible
(III) is not equivalent to
so incompatible

Particle view exerted features?

How substantiated in the view?
Particle concepts drop out of QFT?

no TI
Superposition = Extended Particle Substitution?

Reverts to realism

fuller is a proxy do q.
at a long, far short

Predictive
success
of QED

Hyp. for
realism?

J. Cushing 'Models, High-Energy Theoretical Physics
and Realism.' PSA 1982

-
1. Use of abstract formal models
 2. Plurality of creation / Truth/certain know
also objective / subjective, rational / nonrational
 3. Reality of theoretical entities.

p.7 Scientists are clever people who make their
theories work, rather than as discovering laws
of nature which preexist outside their own minds

Hermann & McGraw Neutonen Forces]

Lockean Powers - - USN Sci 3 (1971) 233.

Naen shows that power is 1st c relation
that subdivided into

masses of matter, factor of action
and attracted powers are of equal

of matter - which are no ^{reduced qualities} other

than field diffused throughout

space \rightarrow Faraday's concept

of physical field
